DEEPALI YADAV

React JS Developer

📞 8700242851 @ dy19648@gmail.com 🔗 www.linkedin.com/in/deepali-yadav-288aab160 📍 New Delhi

SUMMARY

Highly skilled ReactJS developer with 3.5 years of hands-on experience specializing in crafting dynamic and responsive user interfaces. Proficient in ReactJS, Next.js, JavaScript, HTML, and Git, adeptly utilizing these technologies to deliver robust solutions. Demonstrated expertise in tackling complex development challenges, exhibiting a problem-solving mindset and attention to detail. Proven leadership capabilities as a project lead, effectively managing and guiding teams of 4-5 developers to successful project completion

SKILLS

NextJS   ReactJS   Javascript

React Native   HTML   CSS

ExpressJS   Git

PROJECTS

ANTRIKA HELP CENTER

A comprehensive Help Center using Next.js, a React framework. The Help Center serves as a central hub for users to efficiently access resources, FAQs, and support documentation

ANTRIKA (ADMIN PORTAL/CUSTOMER PORTAL)

🔗 app.antrika.com

A Customer feedback management portal to collect feedbacks from customer in order to make product decisions better. Antrika is a tool for SaaS, helping you collect and organize feature requests to better understand customer needs and prioritize your roadmap.

TRACKWICK (WEB APP/APP/DESKTOP APP)

🔗 go.trackwick.com

React.js based Employee Efficiency portal for maintaining and recording the productivity of the employees including many different aspects related to an employee like tasks, expenses, leave management, attendance details, payroll, human resource management.

TrackOlap (PORTAL/EDUWICK APP)

🔗 vehicle.trackwick.com

Portal for maintaining the record of the vehicle using a GPS enabled device. In this platform, records of the vehicles are kept and accordingly the owner can track his/her vehicle including the live location, trips, playback and alerts related to geo-fence. (Used React.js and different libraries like react-leaflet, leaflet-draw, recharts).

iClozure

Banking related portal where different agents have access to the financial-institutions and their plans related to the credit-cards and other services. These agents thereafter work to gather the leads and onboard them according to the customer needs and suitably available plans. (Used React.js and relevant hooks).
